Natural Quartz Surfaces™

Cambria is pure natural quartz. Variation in the natural stone (quartz) color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Color blotches are intended and designed into many colors to enhance the natural beauty. Samples are small select cuts from a slab; they do not exhibit all the characteristics of a color and therefore are not fully representative of what will be installed. Product will not be replaced due to these variations. Cambria is durable and more resistant to surface damage than other stone. However, all stone can be damaged by force and no stone is chip-proof. Objects hitting edges particularly at sinks or dishwashers may cause chips. Though a minor knife slip will dull the knife and not harm Cambria, no stone surface is scratch-proof. **Surface markings are more visible on monotone colors than multi-colored surfaces.** Cambria is not a seamless product, seams are visible. Where there are seams the product pattern and shade can change. Natural stone surfaces can be damaged by sudden and/or rapid change of temperature especially near the edges, as well as direct and/or sustained heating of the top. Cambria may not withstand the direct transfer of heat from pots and pans and other cooking units such as electric frying pans and griddles, and some crockpots or roaster ovens and heat lamps. Therefore, the use of a hot pad or trivet is always recommended to prevent heating the product. Cambria is not a structural support material.

White Cliff™ is a unique, pure white color and can show markings caused during normal use. Parys™, Rosslyn™ and Minera™ are very unique members of Cambria's Jewel Collection™. These special quartz designs have aesthetics found only in nature that originate from minerals in the earth's crust. In that spirit, these distinctive and treasured colors have surface deviation to the touch and appearance. Our desire, and the market demand for these looks compel us to offer them to you as they are -- naturally dominated in free flowing quartz crystals.
